

Zendelity Professional Services

Make it Your Own

At Zendelity we recognize that one size does not fit all. That each hotel, cruise ship, convention center, or resort has its own unique identify and way of doing things.

To help make Zendelity Command Center your own, choose from a portfolio of services designed to help customize the solution to the unique requirements of the individual customer.

Anything is possible, Zendelity can design, build and implement your unique ideas.

- Integrate the business applications that run your operations to create unique opportunities.
- Harness the data being created with from the Internet of Things, action it faster.
- Transition guest mobile applications from static data to an integrated staff and guest communications tool.
- Explore innovative ways to solve your specific challenges.
- Get up and running faster, with less resources.

Zendelity Professional Services

Make it Your Own!

Application integration

The applications used to run your business have been specifically chosen to solve unique requirements. As individual entities, they are invaluable. As an integrated solution, they present unlimited opportunity.

Engage Zendelity Professional Services to integrate Command Center with any application across your infrastructure, from your Safety Management System, to PMS, PBX, CRM, POS, handsets, etc.

Data integration

The data being generated from the machines that run your operation and the information it creates, could help elevate your success, if harnessed. Each time a button is engaged, an alarm or sensor is activated, that 'event' tells us something, such as the elevator is malfunctioning or a window/door is unlocked. The faster that new event is communicated and actioned the faster we can address and rectify the issue at hand.

Engage Zendelity Professional Services to work with your team to identify areas across the facility where we can transition these events into action with integration to Command Center.

Content presentation

Every operation has a unique way in which they communicate with their guests and staff which has been designed to support their processes, identify and brand.

Engage Zendelity Professional Services to extend the powers of Command Center to room phones, mobile applications, DECT phones, etc.

Consulting

Often, we find ourselves in a situation where we know what we want to do but are not 100% clear on the best way to get there. Or we get caught up in the technology and get distracted from what we are trying to accomplish, resulting in a miss, instead of a hit.

Engage Zendelity Professional Services to help you explore innovative ways to solve your specific challenges on a consulting basis.

Deployment services

Need an extra set of hands? Engage Zendelity Professional Services to help with set-up, install, upgrades etc. as and when is required.
